Dated: Jun 18, 2009

Payment Gone, LLC. today launches its Khafre Portal Website which provides information about the company's one-of-a-kind networking and tracking software, Khafre®, as well as tutorials and documentation supporting the software.

Payment Gone, LLC. today launches its <http://www.KhafrePortal.com> Website which provides information about the company's one-of-a-kind networking and tracking software, Khafre®, as well as tutorials and documentation supporting the software.

Khafre targets firms that leverage outside originators, require document generation, and order industry related products. The Khafre system networks these firms together using a unique peering system. Peering firms together allows for tracking of product orders, document generation and data capturing for many related products like loan modification, debt settlement, forensic audits, and more. This intuitive and dynamic software launches this software to the front of the line. The system is setup with three very easy entry points; Back Office, Originator, and Client logins all for the purpose of obtaining the data quickly, efficiently, and continuously.

The Khafre system targets both small and large companies who require administrative control over users that supply data via secure access. Khafre enables instant communication between all parties through its Alerting system, which conveniently keeps track of correspondence between the customer and the provider. This allows for complete tracking and auditing of all activities on the system.

“Payment Gone’s Khafre software has helped us become a leader in the loss mitigation field” said Victoria Federico of National Loan Resolutions. “The ease with which the software is used allows all parties involved, from the client to in-house processing, to obtain information and start processing quickly. Uploading data straight into the program moves things along giving us the opportunity to start helping our clients right away.”

###
